ADMINISTRATOR TRAINING

May 6th - 8th, 2009 in Frankfurt

Learn it, try it, do it! Administration Essentials is a highly interactive course designed to teach you everything you need to know to quickly and successfully implement and maintain your BigMachines solution.

This comprehensive training program teaches participants the fundamental concepts of setting up, customizing, and maintaining BigMachines solutions. Students will become familiar with the standard business processes enabled in the application and how they can be used for best business results. The application architecture and prebuilt capabilities of BigMachines are taught in the context of a proven implementation strategy by certified BigMachines instructors and Professional Services experts. Through a series of hands-on labs and exercises, participants practice key tasks associated with setting up and maintaining BigMachines applications, putting their knowledge to work in an interactive session.

Administration Overview

- o Web Manager: Customizing Branding & Site Options
- o Managing Users and Roles
- o Understanding Visibility and Data Access
- o Importing and Exporting Parts and other Data

Configuration

- o Building and Maintaining Product Families
- o Setting up and Building your Configuration Model
- o Advanced Function Scripts

Commerce Processes

- o Understanding Business Processes in BigMachines
- o Customizing Commerce Process Fields and Layouts
- o Customizing workflow steps

BigMachines Document Engine

- o Overview on using the BigMachines Document Engine

Questions and Best Practices

- o Practice Administration by Setting up Examples
- o Learn How to Best Maintain Your Unique Configuration of BigMachines

COURSE AUDIENCE

This course is appropriate for application administrators, implementation team members, business analysts, consultants, or other individuals responsible for successfully implementing and administering BigMachines solution.

“BigMachines delivers powerful 100% web-based administration capabilities that allow us to quickly and easily maintain the solution.”

- SPX Corporation
